

I'm not a bot

I used to be a struggling freelancer working from my garage, doing everything myself and figuring things out as I went along. My hourly wage was a measly \$3, but that wasn't the only reason for my meager earnings - I had no process in place. Each project was a new adventure, with me reinventing the wheel every time. This led to last-minute scrambles, stress, and missed deadlines I'm not alone in this struggle. Many freelancers face similar challenges: dealing with excessive revisions, unpaid invoices, unhappy clients, and the daunting task of delegating work. I had so many opportunities for referral work slipping through my fingers because I lacked a standard approach. It wasn't until I met Matthew Encina that things started to change. Watching him lead his internal team was like witnessing an orchestra conductor at work - seamless and efficient. As we collaborated on projects, our approaches began to overlap, resulting in a winning formula. We've distilled this framework into the Practical Project Management course, which has been used by top clients like XBOX, AARP, and Hudson Pacific Properties. The course is more than just a philosophy; it's actionable, industry-proven steps that work with any project management software. It will teach you how to make the most of every project, free up time for the tasks you love, and scale your business by delegating effectively. Don't miss out on this opportunity to take your projects from chaotic to streamlined - sign up now! More than 300,000 minutes of content are watched every month, now easily accessible to you. My journey in project management began in the aerospace industry, where success was crucial. I worked on a \$3 billion helicopter integration effort and managed projects worth \$140 million, \$55 million, and \$20 million. As a consultant, I helped numerous organizations with their PM needs, including government and non-profits. Along the way, I developed this course, teaching it over 330 times to more than 3,300 people. The most important lesson I've learned is that project management should give back more than it takes - it must be simple and practical. This course offers a straightforward guide to managing projects of any size or domain, drawing from proven PM processes. By the end, you'll not only understand PM principles but also know how to implement them efficiently. You'll receive a certificate allowing you to append PPM after your name, which thousands of professionals have already done on LinkedIn. The comprehensive course is divided into over 200 short videos, covering fundamental concepts, team management, and essential PM processes. It includes software tool guidance and provides a complete resource for becoming an expert project manager. You'll also receive: example project documentation, MS Office templates, and the "Project Planning With MS Office" guide. Whether you need to manage a project now, prepare for a PMI exam, or enhance your career, this course is designed to help. Additionally, you'll earn 16 Professional Development Units (PDU's). "I'm impressed by how much value I got from learning about specific PM functions in this course, and it's helped me boost my resume tool!" - Dan Bischoff "After 20 years of experience, I can confidently say that this training material is the best thing I've ever used." - Christopher Irons "I've been a PMP since 2006 and gained so much knowledge from this course, which really stands out." - Mark Thorogood "Hands down, this project management course has been the most effective one I've taken!" - Susan Steigler "This is my go-to real-world practical PM course online, offering valuable insights and clear guidance without wasting time." - Sarah Hajipour "As a Project Manager, I consider this course to be among the top resources for me and my team members." - Philip Kohler "I wish I had taken this course before my PMP exam - it's truly excellent!" - Thomas Flores "You won't need any other course; this one covers all project management phases with examples, anecdotes, and templates - highly recommended!" - Allan Madhuram "Even after earning my PMP certification, I was blown away by the practical insights from this course, which I wholeheartedly recommend." - Raj Bidika "This project management course exceeded my expectations in every way; I'd definitely suggest it to anyone interested in PM." - Mark April "The course is incredibly straightforward and easy to understand - wish I had taken it before my PMP test!" - Alexander Feravich "Great course, perfectly delivered! The PMBOK Guide applied in a real-world context - I plan to take this course again and again!" - Alain Yeno "This course not only teaches you project management skills but also valuable life skills that will last a lifetime." - Saad Faruqui "I'd recommend taking this course before consulting any other material; it's direct, informative, and easy to understand." - Rufus Okomhanru "The course was amazing, with plenty of real-life examples. As someone with 17 years of PM experience, I've never seen a more concise, informative, and easy-to-understand PM walk-through!" - Vladimir Mitev "Even after managing projects for several years, I picked up key points that will improve my work in the future and would have made previous projects better if I'd known them sooner." - David Morrison "This course was worth every penny; my only regret is not taking it sooner!" - Nicholas Ikpi "One of the greatest courses I've ever taken - short videos, digestible at your own pace, with a warm environment that makes you feel like you're having a conversation." - Francisco Zapata
