

I'm human

A test bank for microbiology, specifically designed for Gerard J. Tortora's "Microbiology: An Introduction" 13th edition, has been created to cater to students taking the subject from grades A+-20232024. The test bank covers Chapter 1 of the textbook, which focuses on "The Microbial World and You." It includes multiple-choice questions that assess students' understanding of various topics in microbiology. Some key points covered in the test bank include: * Identifying processes where microorganisms are involved, such as decomposition, food production, and infection. * Recognizing organisms that would be considered microbes, excluding mushrooms. * Understanding the term used to describe disease-causing microorganisms (pathogen). * Enumerating common commercial benefits of microorganisms, including the synthesis of riboflavin, acetone, insulin, aspirin, or a combination of these. * Analyzing factors contributing to antibiotic resistance, which include overuse, misuse, random mutations in bacterial genomes, and a combination of these. The test bank is designed to align with Bloom's Taxonomy for learning outcomes, particularly focusing on remembering concepts. It also incorporates ASMcue and Learning Outcome indicators. The provided information suggests that the test bank is an essential resource for students aiming to master the basics of microbiology as presented in Tortora's textbook. This textbook is a flexible and affordable resource for pre-nursing and allied health students. It provides cutting-edge research on microbiology, presented in a clear and balanced manner with concepts and applications. The book includes features like Exploring the Microbiome boxes, Big Picture spreads, and In the Clinic Video Tutors to enhance learning. With Mastering Microbiology, students can interactively learn and review material through online videos, tutorials, and animations. This product is sold separately and does not include MasteringTM Microbiology. If you're interested in buying this content along with Mastering Microbiology, check the correct package ISBN and Course ID with your instructor. Instructors can contact Pearson for more details. To purchase both the loose-leaf textbook and Mastering Microbiology, look for the package with ISBN 0134729331 or 9780134729336.
